WORK EXPERIENCE

QA Engineer АО НПП "РЕЛЭКС"

05/2017 — Present

Voronezh, Russia

Russian IT company with global clients, specializing in their own DBMS and custom software for industries like automation, telecom, and healthcare.

- Performed manual testing of web, mobile, and desktop applications (iOS, Android, Web, Linux), including functional, regression, integration and API testing.
- Prepared and maintained test documentation (test plans, test cases, checklists), created testing reports.
- Organized testing process of the telemedicine application from scratch to release to the stores (App Store, Play Market).
- Wrote and maintained 200+ test cases and made 60+ test runs in Qase.io.
- Developed Cypress automated tests for critical user flows, enabling early detection of defects at the build stage and reducing regression testing time.
- Received 2 official client acknowledgements for providing high quality of the product and user documentation.
- Have experience working with unclear, incomplete, and conflicting requirements, as well as testing under tight deadlines.
- Conducted onboarding for new QA specialists, integrating 2 team members effectively.
- As a mentor, took part in an internship which ended with the recruitment of 2 most successful candidates on QA position.
